

KING of COINS

\$MAMBO

The first Mambo Memecoin on Kaspa

Max Supply: 44'000'000 Tokens

Public Minting:

4'400'000 Tokens (10%). Tokens per Mint: 50

1 mint costs minimum 1 Kas network fees

Those Kas fees go to the Kaspa miners. **88'000 possible mints.**

Total premint: 39'600'000 tokens (90%) for:

28'600'000 Tokens (65%) on sale.

Fair launch according to Mambo's dump protection approach:

Open OTC Sales for all with widespread distribution at lowest price.

80% of funds from sales will be used for liquidity and dump protection price support.

That means, the token MC calculation is not based on thin air. If you ape into Mambo Memes, your investment supports directly the price of the token and is not lost for minting costs, closed VC sales or huge team allocations. No funds for CEX's.

8'800'000 tokens (20%) for liquidity pools

1'320'000 (3%) tokens for rewards or Airdrops to active Mambo fans, community members, meme designers and content creators

0.44m (1%) distributed among Mambo Legacy holders (must be claimed).

0.44m (1%) for Mambo Token Management

Presales started on August 25, 2024

Open OTC Sales: 28'600'000 Tokens = 65% widespread sales!

The goal is a fair widespread distribution of lowest price for 550 individuals:

you must prove to be an individual with username following x.com/MamboCoins

AND join telegram group t.me/MamboToken - no robot account accumulation.

FIRST come (and pay) - First serve according to following table:

The early birds get 3x compared to the late ones. All OTC sales tickets are much cheaper than to mint the remaining tokens.

\$MAMBO OTC Sales: 550 individual tickets			
200 Kas per Ticket			
27,500,000 tokens (62% of total supply)			
200 Kas get	Tokens	1 kas gets	total tokens
First 50 buyers	75,000	375	3,750,000
51-100	70,000	350	3,500,000
101-150	65,000	325	3,250,000
151-200	60,000	300	3,000,000
201-250	55,000	275	2,750,000
avg 251-300	50,000	250	2,500,000
301-350	45,000	225	2,250,000
351-400	40,000	200	2,000,000
401-450	35,000	175	1,750,000
451-500	30,000	150	1,500,000
501-550	25,000	125	1,250,000
Total			27,500,000
Marketplace	1,100,000	40-80	
Tota tokens on sales	65%		28,600,000
Mint	1 mint gets	50	
Total tokens to mint:	10%		4,400,000
possible mints	88,000		
Est. initiall swap LP price if all sold:		30 - 49 /kas	
MC estimation when all is sold & minted	220,000Kas		

Unsold tokens: After about 3-8 weeks from launch we will put the rest of the tokens on the marketplace at **5x to 10x, 100x, 1000x and 10000x or more** of highest presales price.

First pay first serve. In case you pay to late and sales pool is sold out, you'll be refunded.

Tokens will be distributed after KRC-20 mainnet relaunch within 2 weeks of your order.

We must control the ticket sales and make the payments manually, checking the usernames, balances, this takes time. Payout in the order of the incoming paid tickets.

Sales to proven individuals guarantees a widespread mixture of many individuals aping in a lowest price and prevents whales accumulations at lowest prices. Ideal dump protection. Whales are welcome to buy and mint, they too get their share of lowest sales.

Where to buy \$MAMBO at launch?

The OTC Sales order Form is on <https://Mambo.Li>.

1. Fill the form with your wallet address, username from x and tg.
- 2: Pay 200 KAS to our wallet
- 3: Get the tokens to the wallet you gave in the application. (Up to 2 weeks after deployment.)

We plan to build our own automated fixed rates exchange, specially for trustless fair launches of meme and solidcoins in future.

The Story of Mambo - The King of Coins

MAMBO is a Memecoin. No real utility than fun to ape into unique KRC-20 ticker memecoins.

Mambo hopes it goes to the moon. Mambo is the King of Coins and respects that other Memecoins are Kings in their virtual phantasy world. Sometimes we meet, fight, compete, sometimes we fight together against scams, unfairness, fud and non kaspian. If hyenas show up, our parallel worlds meet for a common goal.

The King of Coins goal is to represent braveness, fairness, to bring trustworthiness into a "trustless" space. \$Mambos likes to make it fun to invest and pay p2p on the fasted Ghostdag Kaspia.

Mambos Art of Fair Token Launch is designed to outperform in the long term most of the memecoins, because it's price is to a big part backed from your sales investment kas.

There is a reward pool for active meme content creators.

Roadmap:

\$Mambo, The King of Coins is the first memecoin in the memecoin family of the Mambostan Kingdom. Mambo deployed a cascade of memecoins: \$MAMBO \$LION \$KING

\$MAMBO: 44,000,000 tokens (total supply)

\$LION: 440,000 tokens (you can buy 1 Lion with 500 Mambos)

\$KING: 4,400 tokens (you need 50000 \$Mambos or 500 \$Lion for 1 \$King)

To get early access to Mambo **solidcoins** (better than stablecoins) you may need to hold or pay with Mambo Memecoins.

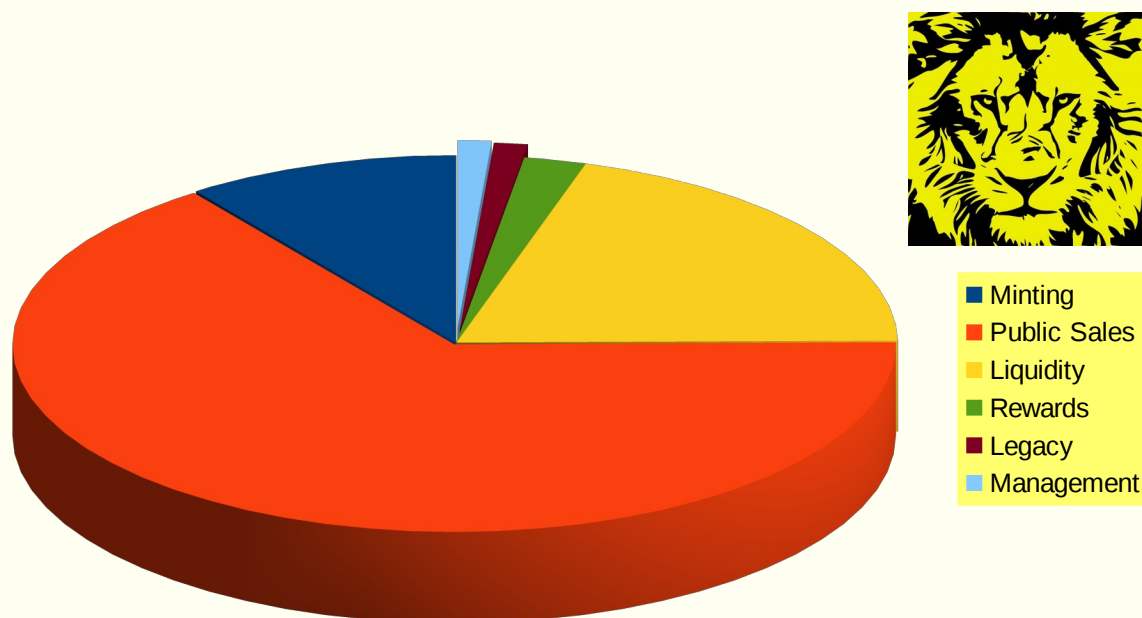

Mambo believes that the uniqueness of KRC20 Ticker names has an 1000x better potential than average memecoins of other chains with multiple imitations and no uniqueness.

Mambo plans to develop a price supporting trading robot, once a swap on kaspex.

Let's MAMBO!

\$MAMBO Tokenomics & graph

Allocations	amount tokens	% of total supply
Public Minting	4'400'000	10%
Public Sales	28'600'000	65%
